General

MYLAPS Practice provides MYLAPS Transponder users and race fans with live race information from circuits that use MYLAPS Hardware around the world. It is your live global score board, bringing you up-to-date lap times whenever and wherever the action is.

MYLAPS manages and generates all X2 practice tracks. The manual below describes the steps to setup a practice track for your X2 timing system

What Practice details do we need to know to create your Practice Track

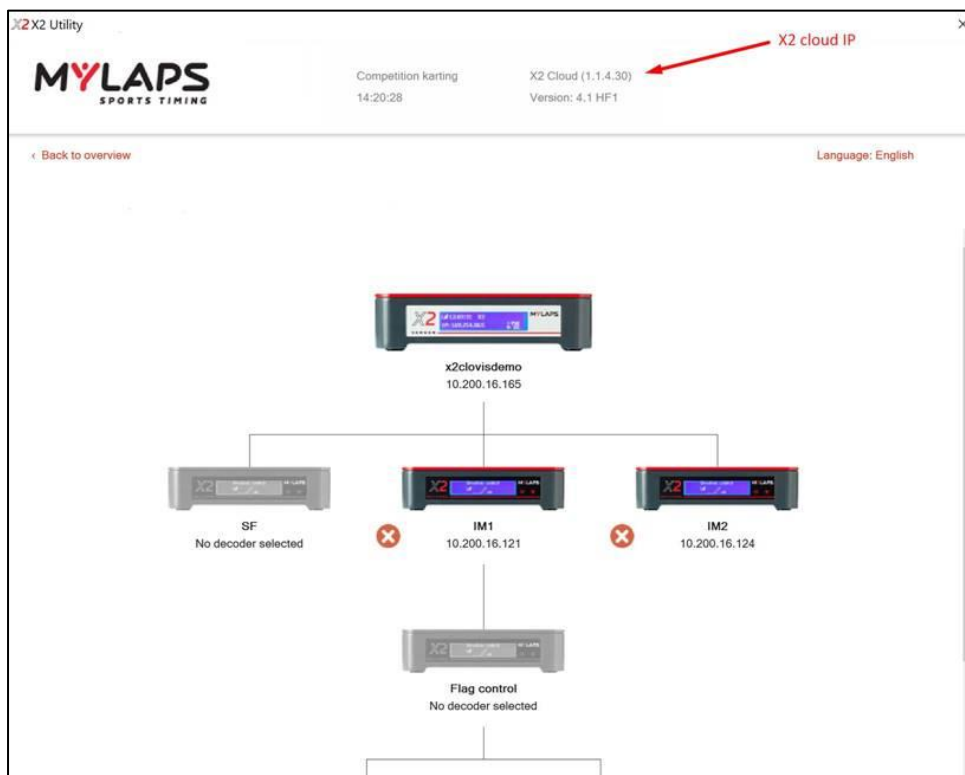

In order to create your Practice Track take the following steps:

- Request your Accountmanager to create a Portal account.
- If you already have an account, login and submit your practice track details to <https://portal.mylaps.com/s/contactsupport>
- Connect the X2 Server and X2 Decoder to an online network.

What Practice Track details do we want to know?

X2 Server references:

- X2 Server serial number – this can be found on the bottom of the X2 Server housing (EA number 00-04-B7-08-xx-xx)
- X2 Cloud IP – This can be found in X2 Utility when your X2 server is online/connected with the internet.

Track references:

- Track name
- Track Length
- Track units (kilometers or miles)
- Track type (dirt or tarmac)
- Sport
- Minimum lap time in seconds
- Maximum lap time in seconds
- Location (name of the city)
- Country
- Time zone
- Description, a short explanation about the track
- Website of the timer or organization.

If your Practice Track has been created, you can find your track on <https://speedhive.mylaps.com/Practice>.

Make sure your track is online. Racers can now join your track and see their results via the Speedhive App.
